

UniFi® switch

UniFi Aggregation Switch Pro

Build and expand your network with the UniFi® Switch, part of the Ubiquiti Networks® UniFi Enterprise System. The UniFi Switch, model USW-Aggregation-Pro, is a configurable 10G fiber Layer-3 switch. It offers 28 10G SFP+ fiber links to your devices and 4 25G SFP28 fiber uplink options to your enterprise network.

The USW-Aggregation-Pro features a 1.3" touch LCM. The LCM provides current switch states and the necessary information you need for quick diagnosis.

Managed and configured by the UniFi Controller with UniFi Mobile app support, the UniFi Switch offers an extensive suite of advanced Layer-3 switching protocols and features, including operation mode (switching, mirroring, or aggregate) per port, Inter-VLAN routing, static routing, and DHCP server. The UniFi Controller and mobile app allow admins to configure and monitor virtually all of the switch features in a graphical user interface from anywhere.
